From automotive EMC chambers to semiconductor cleanrooms, five years have taken me deep into the technical trenches – three years leading EMC compliance testing at Bosch across 15+ OEM specifications, followed by two years at Infineon driving quality automation, failure analysis and AI-enabled technology scouting. With a Master's in Electrical and Microsystems Engineering, I bring hands-on command of ISO 17025/CISPR 25 compliance, SEM/SAM/EDX failure diagnostics, Python/VBA driven process automation and cross-site leadership.

Work Experience:

Infineon Technologies – Regensburg, Germany

AI Engineer (Working Student):

(October 2025 – July 2026)

- Led the rollout of four AI-enabled technology-scouting tools, including MapEgy and Findest, across engineering teams in Germany, India and Singapore, reducing scouting time from hours to minutes and saving up to 30 hours per project.
- Consolidated multi-platform research outputs into decision-ready technical summaries, accelerating pre-development planning and reducing manual research effort for the innovation team.

Research Engineer (Master Thesis):

(March 2025 – September 2025)

- Designed and executed a Transient Liquid Phase Sintering study, optimising intermetallic phase formation in silver-based and alloy-based sintering materials and identifying an optimised composition that nearly doubled the die-shear bond strength to meet next-generation packaging reliability requirements.
- Applied SEM, SAM, EDX and DSC for material and failure analysis techniques across cleanroom and prototype environments, generating insights for high-temperature electronics packaging.

Quality Engineer (Working Student):

(February 2024 – January 2025)

- Designed and deployed Tableau dashboards for Deviation Decision Help data, integrating live production data to eliminating manual entry, reducing reporting time by 30% and improved quality-monitoring visibility.
- Automated recurring Excel/PDF quality workflows using Python and VBA, reducing manual effort by 5 hours per week while improving data accuracy.
- Managed Confluence repositories for FMEA documentation, MRB process records and quality standards current, ensuring audit-readiness.

Bosch Global Software Technologies– Bengaluru, India

EMC Test Lead:

(September 2020 – February 2023)

- Led a team of 4 EMC test engineers taking ownership of full-spectrum automotive EMC testing – including Conducted/ Radiated Immunity and Emissions for automotive chassis & active safety systems across 15+ OEM specifications, achieving complete compliance with ISO 17025, CISPR 25 and ISO 11452-1/2/4 while meeting all KPIs and delivery timelines.
- Engaged with OEM customers, translating customer specifications into precise test execution.
- Delivered technical measurement validation and cross-project review support to 10 test leads across concurrent programs, strengthening team-wide accuracy, reducing review cycles, and ensuring consistent quality of deliverables organisation-wide.

EMC Test Engineer:

(September 2019 – September 2020)

- Enforced zero-defect test documentation standards directly contributing to consistently high client satisfaction outcomes.
- Ensured full ISO 17025 compliance across all test activities for concurrent multi-OEM programs, maintaining rigorous measurement traceability.

Projects:

Project Thesis – Viscosity and Electrical measurements of Magnetorheological Fluids

Ostbayerische Technische Hochschule, Germany

(October 2023 – February 2024)

- Investigated viscosity properties of newly developed Boron-based MR fluids using multiple viscometers.

Bachelor Thesis – On board Charger for Electric Vehicle

Amrita School of Engineering

(September 2018 – February 2019)

- Designed an on-board Level-1 charger prototype.

Education:

Master of Engineering

(March 2023 – July 2026)

Electrical and Microsystems Engineering, Ostbayerische Technische Hochschule – Regensburg, Germany.

Grade: 2.2

Bachelor of Technology

(July 2015 – May 2019)

Electrical and Electronics Engineering, Amrita School of Engineering – Coimbatore, India.

Grade: 2.3

Technical Skills & Competencies:

- Automotive electronics
- CISPR 25, ISO 11452-1/2/4, ISO 17025
- Cross-functional collaboration
- Electrical testing
- EMC/EMV Testing – Radiated/Conducted Emissions & Immunity, ESD
- Failure analysis & root-cause investigation
- Internal & External Audit experience
- Tools – MATLAB, LTSpice, MS Office, GitHub
- OEM/Tier-1 supplier interface experience
- Pre-compliance & compliance test strategies
- Semiconductor (FE&BE) exposure
- Team leadership
- FMEA, MRB, SPC and 8D
- Technical documentation & reporting
- Clean room operations
- Data Analysis and Automation – Python, VBA, Tableau
- Failure analysis & Characterization – SEM, SAM, EDX, DSC

Languages:

- German: B1 (Intermediate)
- English: C2 (Professional)
- Telugu: Native
